

SOMIL RAJ

Java Backend Developer | Microservices | REST APIs | API Integration

PROFESSIONAL SUMMARY

- 6+ years of experience in Java backend development and maintenance of web applications, with strong hands-on experience in REST API development, API integration, Spring Boot, Microservices, Hibernate and JPA.
- Experienced in designing and developing scalable backend microservices and RESTful services for banking and healthcare applications.
- Hands-on experience integrating third-party APIs, including payment processing and notification services, and integrating applications with relational databases such as MySQL and DB2.
- Strong understanding of Agile methodology, MVC and design patterns, with focus on application performance, security, maintainability and unit testing.

CORE SKILLS

Backend & APIs: Java 8, Spring Boot, REST APIs, API Development, API Integration, Microservices

Persistence: JPA, Hibernate, MySQL, DB2

Cloud & DevOps: GCP, Azure, AWS, Terraform

Testing & Practices: JUnit 5, Mockito, Agile, MVC, Design Patterns, Code Reviews

PROFESSIONAL EXPERIENCE

HCL Technologies — Technical Lead March 2025 – Present

Project: Digital Banking Platform | Environment: Java 8, Spring Boot, Microservices, JPA, REST APIs, MySQL, GCP, Terraform

- Designed and developed RESTful backend microservices using Spring Boot and Java 8 for digital banking modules including fund transfer, loan processing and customer onboarding.
- Developed reusable backend components and integrated third-party APIs for payment processing and real-time notifications.
- Worked on API-driven communication across microservices to support modular and scalable banking functionality.
- Optimized SQL queries and Hibernate/JPA mappings to improve database response time and overall backend performance.
- Created unit tests using JUnit 5 and Mockito, participated in code reviews, and collaborated with cross-functional teams in Agile sprints.

Tata Consultancy Services — Software Engineer April 2022 – Nov 2024

Project: Healthcare Domain | Environment: Java 8, Spring Boot, Microservices, MySQL, Azure

- Implemented and enhanced backend components in a Spring Boot microservices-based healthcare application.
- Worked on authentication-related backend functionality including login and refresh-token implementation.
- Supported application monitoring on Azure, investigated defects and delivered fixes for production/support issues.
- Contributed to healthcare modules covering patient registration, appointment scheduling, billing and claims processing.

Fujitsu Consulting India PVT LTD — Associate Application Developer Feb 2019 – April 2022

Project: Healthcare | Environment: Java 8, Spring Boot, Hibernate, Microservices, AWS, MySQL

- Designed, implemented and maintained Java-based backend applications using Spring Boot, Hibernate and microservices.
- Implemented client requirements, application enhancements and bug fixes, and performed unit testing.
- Worked on healthcare process automation for appointment scheduling, billing and inventory management.
- Supported efficient communication between microservices and client applications with focus on low latency and application performance.

ADDITIONAL INFORMATION

Languages: English, Hindi

Name: Somil Raj
