

ARADHYA KUMARI

AI/ML Engineer | Software Developer | Data Analytics

Rajasthan, India | +91 7742875146 | aradhya.8952@gmail.com | [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Final-year B.Tech student specializing in Computer Science & Engineering (Artificial Intelligence) at Banasthali Vidyapith, with hands-on experience in Machine Learning, Deep Learning, Natural Language Processing, and Transformer-based models. During a research tenure at NIT Patna, developed an AI-Generated Text Detection system, evaluating ML, DL, and transformer architectures and achieving 96.8% accuracy with DistilBERT. Proficient in Python, NLTK, Keras, model training, and AI/ML workflows, with a strong interest in building practical, scalable AI-driven solutions. Seeking a 6-month internship starting January 2027 to apply technical expertise, solve real-world problems, and contribute to impactful engineering and AI initiatives.

Skilled at managing high-volume data transactions with strong attention to detail, accuracy, and process discipline, and flexible to work rotational shifts in support of global operations and time-sensitive settlement cycles.

EDUCATION

Banasthali Vidyapith

Expected Graduation: May 2027

Bachelor of Technology (B.Tech in Computer Science Engineering (AI Specialization)) — Grade: A

- **Relevant Coursework:** Data Structures & Algorithms, Artificial Intelligence, Machine Learning, Deep Learning, Database Management Systems (DBMS), Natural Language Processing (NLP)

TECHNICAL SKILLS

Languages & Core Tech	Python, SQL, C, JavaScript, Kotlin, HTML, CSS
Machine Learning & AI	DistilBERT, Transformers, PyTorch, TensorFlow, Keras, Scikit-Learn, NLTK, Model Evaluation, Hyperparameter Tuning, Feature Engineering
Data & Analytics	Advanced MS Excel (Dashboards, VLOOKUP, Pivot Tables), Tableau, Power BI, Data Analytics, Pandas, NumPy, Dashboards, Data Storytelling, Matplotlib
Mobile & Web Dev	Android Studio, Room Database, Firebase, Cloud Firestore, Web Applications

RESEARCH & EXPERIENCE

National Institute of Technology (NIT), Patna

Jun 2026 – Jul 2026

AI Research Intern / Researcher — Patna, Bihar

- Developed an AI-Generated Text Detection system to classify human-written vs. AI-generated content using NLP and Transformer models.
- Benchmarked 9 algorithms (Logistic Regression, Naïve Bayes, SVM, Random Forest, LSTM, GRU, DistilBERT) across accuracy vs. latency metrics, applying rigorous data validation methodology.
- Achieved 96.8% detection accuracy and a 97% F1-score with DistilBERT through fine-tuning, tokenization, and stylometric feature engineering.
- Built an evidence-based decision framework for stakeholders to evaluate real-time model performance trade-offs, supporting workflow optimization and data-driven decisions.

GENAI & PRODUCTIVITY TOOLS

- Leveraged advanced GenAI tools including ChatGPT, Claude, and multimodal text/image-to-video tools to optimize workflows, solve business problems, and enhance productivity while ensuring ethical data usage and critical judgment.
- Applied AI-assisted research and automation to accelerate data analysis, documentation, and quality checks across academic and personal projects, while independently verifying outputs for accuracy.

PROJECTS

AI-Generated Text Detection System

Jun 2026 – Jul 2026

Python, DistilBERT, TensorFlow, Scikit-Learn, NLTK

- Directed a model evaluation initiative comparing classical ML and Transformer architectures on dense text datasets, with structured data validation at each stage.
- Optimized model selection strategy, reduced error rates, and conducted robustness stress-testing across diverse test inputs to improve workflow efficiency.

Cash Cactus — Personal Finance & Product Roadmapping

Aug 2025 – May 2026

Kotlin, Android Studio, Room Database, Firebase

- Formulated an end-to-end feature roadmap for a personal finance application, applying core financial logic and workflow optimization to prioritize features based on user flow analysis.
- Architected local and cloud data management using Room Database and Firebase, building in data validation checks and reconciliation logic to ensure accuracy across transactional data tracking.

SkinAffairsLuxe — E-Commerce Web Platform

JavaScript, Firebase, Cloud Firestore, CSS

- Designed and deployed a responsive business web application with cloud database integration for managing product inventories and traffic analytics, with data accuracy checks embedded into the workflow.

CERTIFICATIONS & ACHIEVEMENTS

- **Cisco Data Analytics Essentials** — Cisco Networking Academy (SQL, Tableau, Data Visualization, Dashboards)
- **Data Science** — Udemy
- **AI For Everyone** — Coursera
- **Paper Presentation:** “Emotionally Aware AI for Natural Interaction” — 3rd Workshop on Applications of Computational Intelligence and Interactive Systems
- **Smart India Hackathon (SIH)** — Participant
