

ARADHYA KUMARI

BUSINESS ANALYST | PRODUCT ANALYST | TECHNOLOGY ANALYST

7742875146 | aradhya.8952@gmail.com | LinkedIn: Aradhya Kumari | Rajasthan, India

PROFESSIONAL SUMMARY

Technology and analytics-focused Computer Science (AI) student transitioning from AI/technical work into Business Analyst, Product Analyst, and Technology Analyst roles. Brings hands-on experience evaluating data-driven solutions, comparing model performance, translating technical findings into actionable insights, and applying product, customer, and business analytics concepts.

EDUCATION

B.Tech, Computer Science & Engineering (Artificial Intelligence)

Expected 2027

Banasthali Vidyapith, Rajasthan, India

TECHNICAL / ANALYTICS SKILLS

Analytics: SQL, Excel, Power BI, Pandas, NumPy, Matplotlib, Data Visualization

AI/ML: Machine Learning, Deep Learning, NLP, Transformers, Model Evaluation

Business/Product: Product Analytics, Business Analysis, Customer Analysis, Business Intelligence, Requirements Analysis

Programming Languages: Python, JavaScript

Frontend & Frameworks: React.js, TensorFlow, PyTorch, Hugging Face Transformers

Tools: Jupyter Notebook, VS Code

Other: Leadership, People Management, Excellent Communication

EXPERIENCE

AI Research Intern | National Institute of Technology Patna

01 Jun 2026 - 15 Jul 2026

- Conducted research on AI-generated text detection using NLP, machine learning, deep learning, and transformer architectures.
- Implemented TF-IDF, Bag-of-Words, N-grams, stylometric analysis, LSTM, GRU, CNN, BERT, DistilBERT, and RoBERTa models.
- Performed comparative evaluation, hyperparameter tuning, error analysis, and robustness assessment across multiple AI-generated-text datasets.
- Achieved 96.8% accuracy, 97% precision, 97% recall, and 97% F1-score with DistilBERT.
- Compared classical ML, deep learning, and transformer models to identify performance trade-offs and support evidence-based model selection.
- Technologies Used: Hugging Face, TensorFlow, PyTorch, Scikit-learn, Python, Jupyter Notebook.

PROJECTS

AI-Generated Text Detection | NLP, Deep Learning & Transformers

15 Jul 2026

- Built and evaluated AI-generated text detection approaches using classical ML, deep learning, and transformer architectures.
- Analyzed model metrics, error patterns, and robustness results to compare solutions and communicate the most effective approach.

Skin Affairs Luxe | E-Commerce Product & Business Analytics

20 Mar 2026

- Developed an e-commerce product experience that combines technology implementation with product and customer analysis.
- Applied business and product analytics thinking to organize customer insights, improve feature decisions, and support a clearer online shopping journey.

Cash Cactus | Personal Finance & Product Analytics

03 May 2026

- Built a personal-finance product concept that pairs a technology solution with structured financial and user-behavior analysis.
- Used product analytics principles to frame user needs, interpret spending-related insights, and prioritize features that support informed financial decisions.

CERTIFICATIONS

Presented paper, "Emotionally Aware AI for Natural Interaction," at the Third Workshop on Applications of Computational Intelligence and Interactive Systems (WACIIS-2025) | Data Analytics - Cisco | AI for Everyone - Coursera | Data Science Course - Udemy
